

Mechanical cable seal for new or installed cables for sealing core drilled holes or wall sleeves (conduits). Made of EPDM rubber to permanently seal the annular space between cables or pipes and the wall opening.

Mechanical seal pressure plate, bolts and nuts must be made of Stainless steel AISI 304 L or 316L.

Mechanical cable seal must have segmented layers for easily adapting to various sizes of cable diameters on site. Cable OD and pipe ID ranges are listed on the manufacturer's literature for proper fit.

Mechanical cable seal must be gas-tight, watertight and rodent resistant. Seal must meet a minimum of 36 psig (2.5 bar) against hydrostatic and gas pressure for 24 hours with no leakage.

Approved Mechanical cable seal: Polywater | Hauff-Technik PHRD SG.

Please refer to Polywater | Hauff-Technik PHRD SG flyer for selecting the proper sized PHRD SG seal. If the cable OD or conduit ID falls outside the ranges listed or if you need a customized sealing solution, please contact American Polywater Corporation.
